GoLocal makes participating businesses bookable by AI agents.

Illustrative eras and typical workflow. Some platforms already transact; complex quotes still need business input.

Billions are backing personal agents and a new way to find local services

$2B+

raised by three agent companies

Hark: $700M+ | Instinct: $1.35B | Town: $55M

$600B

home services within a $2T local-services market

Platforms are opening developer connector ecosystems

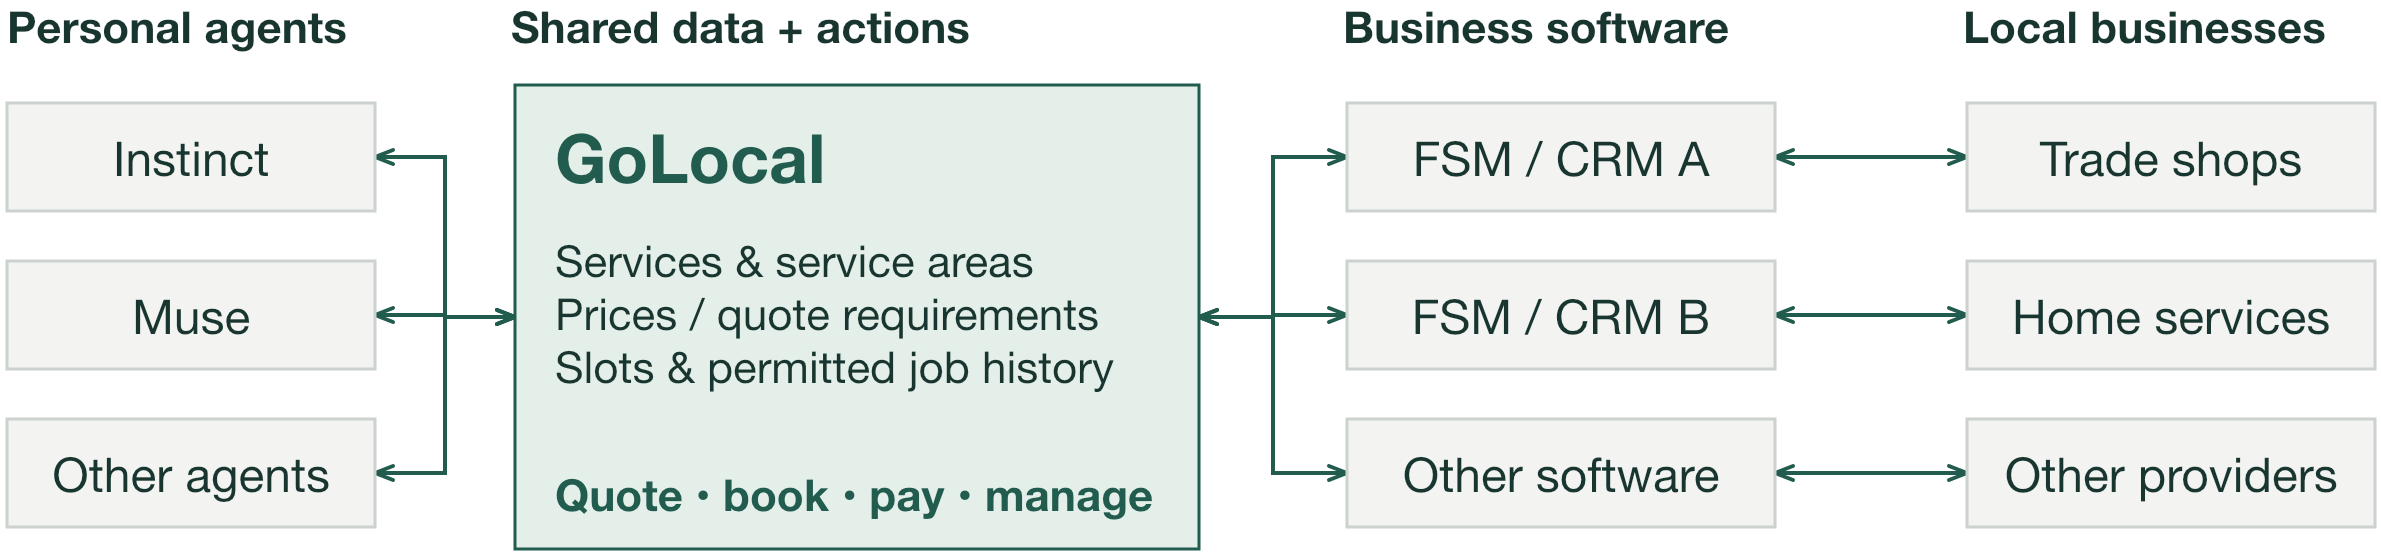

OpenAI Dots	Meta Muse	Claude

Providers use different booking systems.

Uber and DoorDash make booking straightforward.
Local-service agents still cross websites, calls and business systems to get a quote, a slot and a confirmed booking.

One connection to compare and book participating local businesses

One authorized business connection serves every connected agent.

Calls: ask providers one at a time

GoLocal: query connected supply at once

Illustrative lookup target: ~15 minutes → under 5 seconds. Not measured; excludes scoping and booking.

GoLocal earns when a new customer's booking becomes a fulfilled job

Proposed: the supplier pays a success fee. GoLocal shares an agreed portion with the partner that brings the customer.

Direct agent partnership

An agent platform routes relevant requests to GoLocal as an integrated booking tool. A partnership still needs to be secured.

User-added connector

Reach an audience with an urgent need. Help them add GoLocal to their agent. Installation requires customer acquisition.

Strong utility can support recommendations; placement is platform-dependent. Fees and routes remain open.

Partners have agreed to open access to the first local businesses

100+

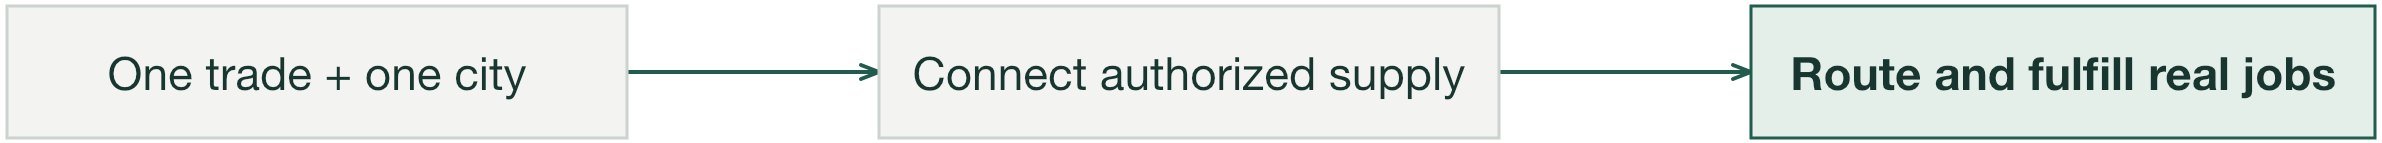

trade shops served by Cactus AI

Salt Lake City and Dallas.
Cactus agreed to introduce shops and provide booking access through its customers.

20

clients committed for onboarding

A separate back-office management company agreed to onboard its clients.

Founder-reported commitments. These are not live GoLocal merchants, integrations, bookings or revenue.

A decade building local services with engineering for the agent era

Pulkit Walia

Founder | HBS MBA

Urban Company founding team.
Spent a decade building local services in Asia, from zero to a $3B IPO.

Rohit Jain

Engineering

Backend engineer with experience at Amazon and Square.
Built production-grade MCP products.
Teaches system design.

GoLocal: the shared data and booking layer for home services.
