GoLocal

Local services, booked by your personal agent.

The shared booking layer
for agents and local businesses.

PULKIT WALIA · FOUNDER

pwalia@mba2027.hbs.edu

Personal agents are a new front door. Local booking is still broken.

Discovery is moving beyond Google. Completion still takes work.

“Book a plumber for tomorrow.”

Search websites. Compare details.
Check availability. Fill forms. Make calls.

Uber and DoorDash organized supply
and made transactions simple.
Local services need that shared layer.

15+ new personal-agent startups in recent months, raising billions.

$2T

local-services market

$600B

home services alone

One connection to local businesses that personal agents can book.

GoLocal combines participating supply with one MCP booking interface.

Personal agents

Get access to local providers. Discover, filter, book and manage the booking.

GoLocal

Connect provider software. Standardize services, prices, availability and booking actions.

Local businesses

Authorize one connection. Reach every personal agent connected to GoLocal.

We build on the software businesses already use.

EARLY VALIDATION

Partners are opening access to our first local businesses.

Partnership commitments

100+

trade shops served by Cactus AI

Salt Lake City and Dallas.
Cactus agreed to introduce shops and provide booking access through customers.

20

clients committed for onboarding

A back-office management company agreed to onboard its clients.

Access and onboarding commitments; integrations and live bookings are next.

Earn when a new customer's booking becomes a fulfilled job.

Proposed model: a supplier-paid success fee, shared with the demand partner.

Start with supply	Use Cactus and operating partners to onboard shops and connect their existing booking software.
Secure demand	Partner with personal-agent companies to route requests. Also test a user-added connector for a specific, urgent need.
Prove, then expand	Start with one trade in a partner city. Earn repeat bookings, then expand across trades, cities and agent platforms.

Next proof: demand routing, reliable completion and willingness to pay. Fees are not yet agreed.

A decade building local services. Engineering for the agent era.

Pulkit Walia

Founder · HBS MBA

Urban Company founding team.
Spent a decade building local services in Asia, from zero to a $3B IPO.

Rohit Jain

Engineering

Software engineering at Amazon and Square.
Built production-grade MCP products.
Technical instructor with 24,000+ learners.

Reimagining local services for a world of personal agents.
