$1.2 trillion+ U.S. local-services opportunity

Each new platform unlocks another step. The transaction gap remains.

	Pre-2000	2000–2010	2010–2020	2020–2025	2026+
Technology	Telephones	Internet	Mobile + GPS	LLMs	AI + tools
Platform	**Yellow Pages**	**Google / Craigslist**	**Google Maps**	**AI chatbots**	**Personal AI agents**

A platform that solves the final three steps can complete local-service bookings and capture value in the $1.2 trillion+ U.S. market.

Mixed-year U.S. spending, including materials. Illustrative eras/workflows; some platforms already transact.

GoLocal connects personal agents to local businesses

The data agents need already lives across businesses' different software systems.

We onboard businesses and connect their existing software.

One connection for agents. One integration for participating businesses.

Proposed network. Software examples and connections are illustrative; merchant authorization is required.

A customer request becomes a confirmed booking

CUSTOMER TO PERSONAL AGENT

“Book a plumber in Dallas tomorrow morning for my leaking kitchen tap.”

PERSONAL AGENT

1 Scope the job

Collects the address and a photo of the leak.
Defines a diagnostic visit.

GOLOCAL

2 Check live options

Matches connected providers.
Returns available slots and visit fees.

CUSTOMER + AGENT

3 Approve the visit

Chooses Oak Plumbing.
Approves the $79 visit and payment authorization.

GOLOCAL

4 Confirm the booking

Books in the provider’s system.
Returns the booking ID and payment status.

Oak Plumbing confirmed for tomorrow, 9–11 am

Booking GL-1042. $79 visit fee authorized. Repairs quoted after inspection.

Illustrative customer journey. Provider, price, slot and booking ID are examples, not live transactions.

GoLocal earns when a new customer's booking becomes a fulfilled job

Proposed: the supplier pays a success fee. GoLocal shares an agreed portion with the partner that brings the customer.

Direct agent partnership

An agent platform routes relevant requests to GoLocal as an integrated booking tool. A partnership still needs to be secured.

User-added connector

Reach an audience with an urgent need. Help them add GoLocal to their agent. Installation requires customer acquisition.

Strong utility can support recommendations; placement is platform-dependent. Fees and routes remain open.

Partners have agreed to open access to the first local businesses

100+

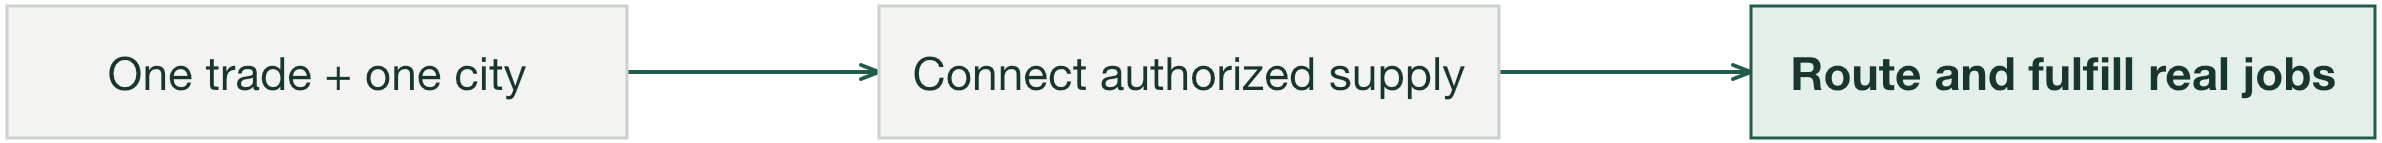

trade shops served by Cactus AI

Salt Lake City and Dallas.
Cactus agreed to introduce shops and provide booking access through its customers.

20

clients committed for onboarding

A separate back-office management company agreed to onboard its clients.

Founder-reported commitments. These are not live GoLocal merchants, integrations, bookings or revenue.

A decade building local services with engineering for the agent era

Pulkit Walia

Founder | HBS MBA

Urban Company founding team.
Spent a decade building local services in Asia, from zero to a $3B IPO.

Rohit Jain

Engineering

Backend engineer with experience at Amazon and Square.
Built production-grade MCP products.
Teaches system design.

GoLocal: the shared data and booking layer for home services.
