GoLocal

Local services, booked by your personal agent.

$1.2 trillion+ U.S. local-services opportunity

Each new platform unlocks another step. The transaction gap remains.

	Pre-2000	2000–2010	2010–2020	2020–2025	2026+
Technology	Telephones	Internet	Mobile + GPS	LLMs	AI + tools
Platform	**Yellow Pages**	**Google / Craigslist**	**Google Maps**	**AI chatbots**	**Personal AI agents**

Live availability	—	—	—	—	Calls / sites
Book & pay	—	—	—	—	Sites / checkout

A platform that solves the final three steps can complete local-service bookings and capture value in the $1.2 trillion+ U.S. market.

Mixed-year U.S. spending, including materials. Illustrative eras/workflows; some platforms already transact.

GoLocal connects personal agents to local businesses

The data agents need already lives across businesses' different software systems.

We onboard businesses and connect their existing software.

One connection for agents. One integration for participating businesses.

*100+ listed plumbing products, Software Advice. Segment examples overlap. Merchant authorization required.

A customer request becomes a confirmed booking

CUSTOMER TO PERSONAL AGENT

“Book a plumber in Dallas tomorrow morning for my leaking kitchen tap.”

PERSONAL AGENT

1 Scope the job

Collects the address and a photo of the leak.
Defines a diagnostic visit.

GOLOCAL

2 Check live options

Matches connected providers.
Returns available slots and visit fees.

CUSTOMER + AGENT

3 Approve the visit

Chooses Oak Plumbing.
Approves the $79 visit and payment authorization.

GOLOCAL

4 Confirm the booking

Books in the provider’s system.
Returns the booking ID and payment status.

Oak Plumbing confirmed for tomorrow, 9–11 am

Booking GL-1042. $79 visit fee authorized. Repairs quoted after inspection.

Illustrative customer journey. Provider, price, slot and booking ID are examples, not live transactions.

Launch locally. Grow through completed bookings.

Build critical mass in one city-category combination.

1 Build local supply

One city

One service category

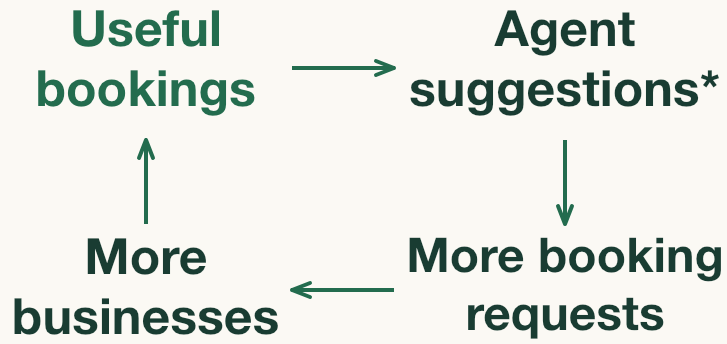

Onboard suppliers to reach critical mass. Recruit users with a specific booking need.

2 Connect once

“Add GoLocal to find me local services.”

One-time setup, with approval. Then use it for future bookings.

3 The network compounds

Expand category by category, city by city.

REVENUE MODEL · PROPOSED

Businesses pay a success fee on fulfilled new-customer jobs. Revenue is shared with partners.

*Recommendations depend on usefulness, reliability and platform rules.

First proof of concept: Salt Lake City plumbing

Two channel partnerships give us a pipeline of provider introductions.

50+

provider introductions in the pipeline

Via Cactus AI

Cactus AI

Agreed to introduce GoLocal to 50+ service partners.

YourCardare

Regional back-office partner

Another 10+ providers in the pipeline.

Pilot goal: turn agent requests into confirmed bookings.

Provider introductions → **Onboard and connect** → **Test first agent bookings**
